

Item	20ft Heavy Lift Platform
Date	08.2017
Revision	0

20ft HEAVY LIFT PLATFORM

PROPERTIES

- Maximum load: 200mt and higher, depending on individual case (dynamic effects included)
- ISO 20ft container adapted size: 6058 x 2438 x 365mm
- ISO twist lock sockets
- Heavy duty H-beam construction with top plate
- Weight about 5.3mt

MAXIMUM LOADS
Load Case 1: 120mt

Load Case 2: 160mt (total)

Load Case 3: 200mt

Note: For the given exemplary load cases, it is assumed that the heavy lift platform rests only on the container sockets. Depending on the individual case and subject to engineering judgement, the maximum loads can be increased by further supporting the sockets and/or platform beams. Please feel free to contact us for your customized engineering solution.
